

CRM Devices 2019/20: Procedure Volumes and Centre Compliance with National Guidance

Centre volume (BHRS 2016):

For each centre, the total of new pacemaker implants is given (recommended minimum 80), and the total of complex device (ICD/CRT) implants + upgrades (recommended minimum 60) is given. Activity is colour-coded red for <90%, amber for 90-110%, and green for ≥110% of recommended minimum volumes. Dark green indicates minimum volume for a pacemaker training centre (105 implants) is met.

NICE Guidance for appropriate pacemaker type (TA324, TA88):

For each centre, the number of cases eligible for validation against guidance is given, followed by the percentage receiving recommended pacemaker type. Figures are colour-coded red for <80%, amber for 80-90%, green for ≥90%.

NICE Guidance for appropriateness of ICD implants (TA 314):

For each centre, the number of cases eligible for validation against guidance is given, followed by the percentage in which ICD therapy is documented to have been appropriate, and the percentage in which there is insufficient documentation to make a determination. Figures are colour-coded red for <80%, amber for 80-90%, green for ≥90%.

Children's hospitals also submit to the National Congenital Heart Disease Audit so figures here may be incomplete. As BHRS and NICE guidance is for adults, these centres have not been RAG rated. In accordance with ONS guidance, exact data have been suppressed where case numbers are less than 3, to ensure anonymity of the patient data included in the reporting.
