

CRM Devices 2019/20: procedure volumes by operator

The table indicates device procedures (new pacemaker implants (PPM), new/upgrade CRT/ICD implants (Cpx), for each operator.

A procedure is assigned to each doctor entered as 1st or 2nd scrubbed operator, or as responsible consultant. Thus, each procedure can contribute to the totals for more than one doctor.

Doctors have been identified solely using GMC No and names/registered specialties have been derived from the GMC List of Registered Medical Practitioners (LRMP).

The occasional appearance of unexpected specialties (such as psychiatry) is generally due to the entry of a valid but incorrect GMC No.

For cardiologists, each specialist's activity has been rated according to the current national recommended minima (35 new total implants for those undertaking pacemakers only, and 30 ICD/CRT implant/upgrade procedures for those undertaking these).

Figures are colour-coded red for <90%, amber for 90-110%, green for ≥110% of these recommendations. For the three-year totals, these thresholds have been multiplied by three.

This guidance is for adult cardiology only, so other specialties and trainees have been excluded from "red/amber/green" rating. Procedures by paediatricians are also submitted to the national congenital heart disease audit, so figures here may be incomplete.

In accordance with ONS guidance, exact data have been suppressed where case numbers are less than 3, to ensure anonymity of the patient data included in the reporting.
