NICOR reporting is changing

> Real-time reports to support quicker clinical changes and improve patient outcomes

> Removal of the need to complete annual validation during the summer months

> Hospitals will undertake ongoing validation throughout the year using the NICOR online tools

> All data must be fully submitted and validated by 31 May 2024

> NICOR will be publish online quarterly reports for the National Cardiac Audit Programme domains and registries beginning in 2024, thus the importance to submit regular data

> The online reports will be in real-time and can be customised

For further information, a demo of the online reports or any questions, contact Anthony Bradley **anthony.bradley1@nhs.net**
