

Table 5 Proportion STEMI patients who do not receive reperfusion therapy

Proportion of patients with a final diagnosis of STEMI who do not receive any form of reperfusion therapy. Patients under the age of 20 at admission as well as those with other forms of acute coronary syndrome are excluded from this analysis. The characteristics of those patients with STEMI admitted to non-primary PCI hospitals is likely to be substantially different to those of patients admitted to primary PCI hospitals. The high rates of 'no-reperfusion' reported by some hospitals may well reflect such characteristics. 'No-reperfusion' rates are not presented for those hospitals reporting fewer than 20 patients. However such hospitals are listed here because they contribute to the overall national rates of 'no reperfusion'.

Hospital	Out of (N)	Received no reperfusion therapy
England, Wales and Northern Ireland	34016	24.38%
England	30558	24.52%
Addenbrooke's Hospital	56	96.43%
Airedale General Hospital	91	30.77%
Alexandra Hospital	24	70.83%
Arrowe Park Hospital	78	93.59%
Barnet General Hospital	<20	
Barnsley Hospital	78	61.54%
Basildon Hospital	936	28.42%
