

Table 4 Secondary prevention medication by eligibility in England, Wales and Northern Ireland

Performance of hospitals with respect to prescription of secondary prevention medication at time of discharge home to patients with either STEMI or nSTEMI. Performance is not reported when there are fewer than 20 eligible patients. Patients are excluded if they were transferred to another hospital or if they died in hospital.

The medication considered in this analysis include, Angiotensin Converting Enzyme (ACE) inhibitors, Angiotensin receptor blockers (ARBs), aspirin, other anti-platelet agents, beta blockers and statins.

Year	2016-2017	
Hospital	Proportion of patients who received all secondary prevention medication for which they were eligible (%)	Out of (N)
England		
Addenbrooke's Hospital	99.08%	217
Airedale General Hospital	100.00%	130
