

Appendix 7: 2016/7 CRM Device Procedure volumes by operator

The table indicates device procedures (new pacemaker implants, other pacemaker procedures, new/upgrade CRT/ICD implants, other ICD/CRT procedures) for each operator.

A procedure is assigned to each doctor entered as 1st or 2nd scrubbed operator, or as responsible consultant. Thus, each procedure can contribute to the totals for more than one doctor. Doctors have been identified solely using GMC No and names/registered specialties have been derived from the GMC List of Registered Medical Practitioners. The occasional appearance of unexpected specialties (such as psychiatry) is probably due to the entry of a valid but incorrect GMC No.

This is the first year that operator volumes are being reported, and figures may be underestimates, largely because of incomplete/incorrect entry of GMC No. For this reason, individual specialists are not explicitly measured against BHRS recommendations, but it is intended to do so in future reports.

Name	GMC	Specialty	Pacemaker implants	Pacemaker other	ICD/CRT Implants + upgrades	ICD/CRT other
