

## Catheter Ablation Reinterventions (1-year): Index Procedure 2017/18

Each ablation procedure during 2017/18 (irrespective of whether it was the patient's first) has been considered an index procedure and the patient followed for 365 days to determine whether that patient has undergone a further ablation of the same (or related) target.

Each patient can only be counted once as a re-intervention for each target. This is particularly important for AF ablations, when a minority of patients may undergo multiple procedures – this will only count as one patient, to avoid skewing of results.

Procedures have only been counted if "Ablation performed?" has been entered as "Yes". Patients have been followed solely using NHS No, irrespective of centre, and [Centre + Hospital No.]

NHS No completeness for each centre in 2017/18 and 2018/19 is given: if either figure is <90%, data for that centre are considered inadequate for analysis: that centre has been shaded in the table and excluded from the funnel chart in the main report. This is because low NHS No. completeness may result in underestimation of true reintervention rates.

In accordance with ONS guidance, exact data have been suppressed where case numbers are less than 3, to ensure anonymity of the patient data included in the reporting.

Hospital	Hospital code	Region	Category	NHS No Completeness %		2017/18 Simple Ablations		2017/18 Complex Atrial Ablations		2017/18 Complex Ventricular Ablations
