

Ablation 2019/20: Data completeness and validity

Completeness (expressed as %) has been calculated for aggregates of a number of fields: demographics (NHS No, Postcode); clinical (basic – documented arrhythmias, other cardiac disease, etc); clinical (AF ablation – additional clinical data only required for AF ablation such as left atrial size, antiarrhythmic drugs); GMC No (first operator + consultant); procedure details (ablation target, success, etc)

Validity checks whether “was ablation performed?” appears to agree with other fields, such as ablation target, success, etc All data are given as percentages, and colour-coded with red <90%, amber 90-95%, and green ≥95%

Blank entries indicate that no procedures were submitted
