

**CRM Devices 2023/24: procedure volumes by operator**

The table indicates device procedures (new pacemaker implants (PPM), new/upgrade CRT/ICD implants (Cpx), for each operator.  
 A procedure is assigned to each doctor entered as 1st or 2nd scrubbed operator, or as responsible consultant. Thus, each procedure can contribute to the totals for more than one doctor.  
 Doctors have been identified solely using GMC No and names/registered specialities have been derived from the GMC List of Registered Medical Practitioners (LRMP).  
 The occasional appearance of unexpected specialities (e.g. psychiatry) is generally due to the entry of a valid but incorrect GMC number.  
 Blanks may indicate fellows not in formal training posts, staff grades, etc.  
 Procedures by paediatricians are also submitted to the national congenital heart disease audit, so figures here may be incomplete.  
 In accordance with ONS guidance, exact data have been suppressed where case numbers are less than 3, to ensure anonymity of the patient data included in the reporting.
