

CRM Ablation 2023/24: procedure volumes by operator

The table indicates ablation procedures (simple, complex, and total) for each operator, along with procedures (mostly electrophysiology studies) where no ablation was performed. A procedure is assigned to each doctor entered, first for 2nd ranked operator. The 2nd ranked operator is the responsible operator. Each procedure can contribute to the totals for more than one doctor. Doctors have been identified solely using GMC No. and names registered specialists have been derived from the GMC List of Registered Medical Practitioners (RMP). The occasional specialties (such as cardiology) is probably due to the entry of a valid but incorrect GMC number.

Blisus may indicate fellows not in formal training posts, staff grades, etc. Procedures by specialists are also submitted to the national congenital heart disease audit, so figures here may be incomplete. No procedure with ONS reference, exact date has been suppressed where case numbers are less than 3, to assure anonymity of the patient data included in the report.

Table with columns: Operator Name, Specialist, 2022/23 (No. Ablation, No. Complex, Total), 2023/24 (No. Ablation, No. Complex, Total), 2024/25 (No. Ablation, No. Complex, Total). Rows list operators such as 711273 Abbal, Mohamed; 207794 Aboagya, Khalid; 625737 Abood, Owen; etc.
